Stake your DAG

To stake your DAG do the following:

1. Launch Edge/Chrome where your StarGazer wallet plugin is installed.
2. Launch the StarGazer Wallet, Enter your password, select your wallet and click off the screen and your wallet will disappear
3. Go to <https://mainnet.dagexplorer.io/staking> and click on Connect Wallet 
4. You should see it change to your wallet address 
5. You should now see the Stake DAG buttons appear on the nodes. Search for the node you want to stake on and click that button.

Documentation in progress.... sorry

Check your staking returns

1. Go to <https://mainnet.dagexplorer.io/staking>
2. Load your wallet plugin and enter the password to open it.

1. The wallet should show up on the top right corner of the staking screen. If not click on connect wallet

How staking rewards are compounded

So if you stake 10,000 and make 50 DAG reward...

That 50 rewards in your is taken into account for calculating your rewards in the next snapshot. So in the next snapshot, it will calculate your rewards based on 10050 staked DAG (instead of your initial 10k). So that's how compounding works.
